Coupeville Wharf Rehabilitation Work

The Port of Coupeville's

comprehensive restoration of the historic Coupeville Wharf continues with exterior building upgrades.

This "envelope" project involves replacing exterior wood shiplap siding and installing new exterior sheathing, weather resistant barrier, and wall insulation.

The rehab work also includes selective replacement and restoration of exterior wood windows and doors.

As reported last month, we are also reinforcing the bulkhead on the shoreline, which is eroding from weather and age.

Coming in November + December:

WA INVASIVE PEST PROGRAM

The Port is participating in the WA Dept of Agriculture's Pest Program at Greenbank Farm. We're happy to

report there's been no positive invasive pest positive tests to date!

The public can also get involved in monitoring for pests, there are many good reasons to do this:

"Washington's environment faces a constant threat – the accidental introduction of invasive pests that could ruin ecological systems, parks, gardens, farms, and even our economy."

We've linked to the program information on what pests to look out for and how to report them.
